Nitrosamines & Melamine Free Statement

Fluid Path Products, LLC certifies that final production articles comprised of Platinum Cured Silicone, EPDM, FKM (Viton), Stainless Steel filled PTFE in all varieties and colors are nitrosamines free. Also, no nitrosamines are intentionally added or introduced during the manufacturing process. Nitrosamines are formed when secondary or tertiary amines react with a nitrosating agent, such as nitrous acid. These compounds are of concern because they are potential carcinogens. Fluid Path Products has concluded that nitrosamines are not a component in the raw materials we purchase or products we manufacture.

Non-Controlled Copy

Additionally, to the best of our knowledge, no products manufactured by Fluid Path Products contain melamine. Melamine is not added by Fluid Path Products or its suppliers, and the material does not come into contact with melamine at any time during the production process.
