

Fluid Path Products

**Sealing Technologies For High Purity Applications for
Biotech, Pharmaceutical and Food industry**

Compounds That Perform

Engineered and proven to outperform the competition

Platinum Silicone: provides the highest in purity for pharmaceutical and biopharm applications in the world

EPDM Molded Products: we proudly produce the longest life, lowest stick EPDM in the industry

Expert producer and blender of **Virgin and Modified PTFE** based products

FluoroSteel: USP Class VI tested, providing steam resistance in an inert chemistry for Pharma and Biopharma applications, and offer metal detectability in food processing applications.

Compounds That Perform and are Detectable

We are the pioneers of the Metal Detectable Polymer Products
Capability includes Clamp Gaskets, O-rings, Unique Shapes, Valve and Pump Parts

Gasket Technology Metal Detectable Gaskets: available in any rubber polymers. As the creator of sanitary metal detectable gaskets, we have continued to develop our metal and x-ray detectable products to be the most detectable product and longest performing.

FluoroBlueDetect: the most Detectable gasket on the market. It is PTFE blended with a proprietary FDA grade stainless that is more detectable than 316L blends and it's magnetic as well

POLYMER TECHNOLOGIES FOR HIGH-PURITY PROCESSES

IN-HOUSE ENGINEERING: Our team has years of fully performing and controlling the design and development from our compounds to our finished products.

IN-HOUSE TOOLING DESIGN & DEVELOPMENT: FPP designs our production tooling in-house, enabling us to quickly service a product for your application

IN-HOUSE PRODUCTION: We produce polymer products of all types in both our Texas and New Jersey facilities. This gives us the best chain of custody in the industry. It also enables us to innovate and deliver problem solving polymer products from concept to reality.

Our combination of biotech, pharmaceutical and food processing knowledge puts us first in servicing the industry the way it should be serviced with the highest quality and process controls. Since this is done in-house, we achieve bringing finished products to market with the greatest speed and efficiency.

Call us to start using the longest lasting, highest purity processing parts in the industry
